Timber Purchasing Policy

As Trentwood undertakes to only purchase timber for production and transportation purposes that is obtained from sustainably and responsibly managed forests and stands.

With regard to controlled timber, the company will use:

- Timber from forests in accordance with internationally recognised controlled timber criteria and where timber suppliers can prove its origin at all stages of the supply chain in accordance with the legal timber certification system development by Trentwood B.V. The system in place is based on corporate principles of accountability and has obtained the approval of an independent authority.
- Trentwood confirms that company timber procurement and manufacturing processes comply with the requirements of the EU Timber Regulation.

Information regarding the Trentwood B.V. chain of supply is publicly available.
